

# THE MULTI-TOOL JUST GOT A **REALITY CHECK**

It's not an act. It's not a fashion statement. A multi-tool should be built for real challenges – and work like the real thing. No matter what.

See the full story at [center-drive.com](http://center-drive.com)

**NEW**

## **CENTER-DRIVE™**

Experience uncompromising performance through revolutionary design. Innovative Center Axis Tech™ aligns the driver to work like the real thing, yielding maximum torque and rotation.

### **Box:**

- 30-001193** [includes sheath]
- 30-001194** [w/ bitset + sheath]
- 30-001195** [w/ MOLLE sheath]
- 30-001196** [w/ bitset + MOLLE sheath]
- 30-001197** [Berry sheath]
- 30-001198** [w/ bitset + Berry sheath]

### **Blister:**

- 31-003073** [includes sheath]
- 31-003074** [w/ bitset + sheath]
- 31-003075** [w/ MOLLE sheath]
- 31-003076** [w/ bitset + MOLLE sheath]

**UNSTOPPABLE**  **GERBER®**

## SCREW CONVENTIONAL THINKING

It seems so obvious – but until now no multi-tool has ever offered a **full-size driver on the center axis** with a standard bit. The result is all the ergonomics and torque you'd expect from the real thing, ready at the flick of a thumb.

## BEND IT TO YOUR WILL

Adjust to your environment, or force it to adjust to you. It's your choice. **One-thumb opening sliding jaws** deliver instant command of the spring-loaded pliers, so you can take control of whatever's at hand.

## CUT THE B.S.

Get right down to business. A single flick of the thumb gets you access to a **full-size outboard knife that is 30% longer** than the competition. Don't worry, reverse thumb support gets the job done in confidence. No compromises – in no time.

# WAVE GOODBYE TO COMPROMISE

Second best is nothing to strive for. To trump the multi-tools that preceded it, the Center-Drive had to be real, tough, innovative – and it is. In the inevitable tool to tool showdown, there is no contest.
